NOW

Calista: The Face Awakens

FOREHEAD
"A brow lift appears to have given nice elevation and arch to Calista's brows at age 51," notes Nashville, Tenn., plastic surgeon Dr. Nicholas Sieveking. Cost: \$5.5K to \$8.5K.

EYES
"Her lower lids look smoother with restored volume — likely the result of a lower blepharoplasty [\$3K] and fillers in her tear troughs," says Dr. Sieveking. "She also appears to have Botox in the crow's-feet."

NOSE
An apparent "uneven" rhinoplasty has "been corrected," observes Dr. Sieveking. "Her nose is now balanced, symmetrical and fits the rest of her facial features." Cost: Up to \$12,500.

CHEEKS
"It's noticeable that her cheek region has been filled," adds Dr. Sieveking. "This could be from fat injections [\$5,000], which usually give smoother, longer-lasting results than synthetic fillers."

Calista Flockhart recently revealed that, despite their 22-year age difference, she "sometimes feel[s] very much older" than husband Harrison Ford. When it comes to her appearance, though, the real-life wife of *Star Wars*' Han Solo

seems, at 51, to have entered a time warp. Could it be the Force keeping her youthful? Not likely, say experts, who believe the mom of one is waging her war on wrinkles the earthly way — with the strategic skills of a plastic surgeon. "Filler injections in her cheeks,

lips and tear troughs have given her a smooth, natural result," says Nashville, Tenn., plastic surgeon Dr. Nicholas Sieveking, who does not treat the *Supergirl* actress. "And Botox in her crow's-feet looks good — not frozen, as sometimes occurs." Additionally,

he suspects Calista's flawless features have benefited from the scalpel, with signs of a brow lift, lower blepharoplasty (eye-lift) and a corrective nose job. "Prior to June of 1999 [above left], she obviously had a rhinoplasty that resulted in an uneven, pinched nasal

tip and an uneven dorsum," believes Dr. Sieveking. "But those cosmetic deficiencies have since been corrected." Overall, he raves, "Calista has preserved her skin and youthful appearance very well." May the fillers be with her! **LS**

The Man's View

BEFORE OR AFTER POUT PLUMP?

Brielle Zolciak-Biermann

Nip/tucks run in the family! Kim Zolciak-Biermann's 18-year-old daughter was ecstatic after getting filler injections from Beverly Hills dermatologist Simon Ourian (who also treats Kylie Jenner) in November. "My lips are my biggest insecurity and I'm so happy [with] my results," the *Don't Be Tardy* star raved about her newly amplified pucker. The male review, however, was not as positive. Guys we polled say Brielle was "cuter" and "less plastic" before the plumping.
